

Dear FCC.

Whose interests do you represent? Isn't your job to foster an environment that benefits *consumers*?... not the small handful of global media behemoths that want you to tell me what I can I can't do with my own electronic equipment?

Please stand up for my right to watch programming when and where I want. Please let me archive my favorite shows so I can enjoy them on rainy days. Please don't make me and my electronic gadgets a slave to Hollywood accountants. Hollywood has too much political power already. At least allow ME to be in control of my own gadgets.

Please ignore Hollywood's attempt to gain even more control. Do not permit the establishment of a "broadcast flag". Thank you.

Lee Bottemiller.
